DRAW YOUR OWN COMIC: FOREST FIRES

Trees have always been an important natural resource in New Hampshire. But between 1875 and 1915, forest fires became a big problem in the White Mountains. They destroyed many beautiful landscapes that tourists like to visit each summer.

How would those forest fires begin? What events led to the spread of the fires? Using the comic strip boxes below, draw out the ways in which those fires started, and how they impacted the environment of the White Mountains.
