

MY COMMUNITY RESPONSIBILITIES

By the second half of the 19th century, many of New Hampshire's natural resources were in danger. Granite Staters realized that they needed to come together and do a better job of taking care of the environment.

What are some ways that you can care for the environment in your community today? Think about the questions in each of the boxes and brainstorm what you think those responsibilities include.

Draw a picture of one of the responsibilities.

How can I help care for the environment in my neighborhood?

In what ways can we protect the environment while at school?

How can I help protect the environment at home?

What would happen if I didn't care for the environment?
