

NAME: _____

FIND YOUR WAY: GATHERING NATURAL RESOURCES

When the English settlers first came to New Hampshire, they had to gather natural resources to build the things they needed for their new settlement. Can you find your way to the forest from your settlement?

The maze is a square grid with a complex path of walls. In the center of the maze is a small brown house with a chimney and two windows, with the text "Start here" above it. On the left side of the maze, there is a cluster of four green trees of varying heights, with the text "End here" above them. On the right side of the maze, a cartoon moose with large yellow antlers is peeking over the edge.
